Description:
IObit Uninstaller 10 is a perfect uninstallation tool. It provides an easy and secure way to thoroughly remove unwanted programs, Windows Apps, Universal Windows Platform (UWP) apps, and malicious/ad plugins, giving you a clean PC and a secure & smooth online surfing experience.

As the first uninstall utility that comes up with the idea of bundleware removal, IObit Uninstaller has further optimized the algorithm to better detect bundleware at the very time when they are installed, which allows users to uninstall all unwanted bundleware more conveniently and timely.

Other features in IObit Uninstaller are also wonderful. Real-time Install Monitor detects and logs changes made to your system during a program installation, which allows you to see what changes the monitored programs did during the installation. It is worth mentioning that Install Monitor newly supports monitoring system services, scheduled tasks, and DLL registration. Meanwhile, Software Health helps optimize all installed software to make them run smoother and also reduces security risks. Moreover, it newly supports blocking browser site notification prompts from interrupting you. With the enhanced scan engine and greatly expanded database, IObit Uninstaller can remove more stubborn programs and malicious/ad plugins, and ensure all leftovers to be removed thoroughly from the computer just like they've never existed. It also supports removing Windows apps under non-administrator accounts and the latest UWP

apps on Windows 10 to free up more storage space. What's more, the optimized Software Updater now supports updating multi-language versions of some popular programs, like Firefox, WinRAR, and Mozilla Thunderbird.

All in all, IObit Uninstaller 10 is an all-in-one uninstallation utility to uninstall software, bundleware, browser extensions, and Windows Apps for a clean and safe PC.

What's new:
+ Increased uninstall speed by 50%
+ Improved scan algorithm to scan 30% more uninstallation leftovers
+ Enhanced Software Health to newly support blocking site notification prompts from interrupting you
+ Enhanced Install Monitor to monitor more programs installation and newly support monitoring system services, scheduled tasks, and DLL registration
